WASHDOWN AIR HOIST

KITO®

Keep it clean.

The TCW Series Wash Down Air hoist is specially designed for environments where the equipment must be washed off on a regular basis: humid, corrosive, and outdoor environments are no match for this hoist.

1 Unpainted Aluminum Hoist Body

Extremely compact and lightweight cast aluminum body provides easy operation, transportation, and storage.

2 Lube-Free

Lubrication free operation makes this hoist suitable for specific applications where a clean environment is a necessity.

3 Unlimited Duty Cycle

Continually operate the hoist without worrying about damage from too many starts per hour, so you can get the work done on your schedule.

4 High Speeds and Precision Control

Extremely fast lifting and precise feathering control (spring-loaded multi-vane motor) for when production efficiency is critical. Adjustable speeds for your needs.

5 Reduced Noise Levels

The external muffler and airtight body contribute to the dampened noise levels and efficient use of air. Low noise levels add to operator comfort.

6 Corrosion Resistant Chain & Load Hook

The standard zinc-plated load hook and nickel-plated load chain are resistant to corrosion, abrasion, and wear.
